

 MIT Academy of Engineering (An Autonomous Institute)	CA Activity No-1(20 Marks)	
	ACADEMIC YEAR	2025-26
Alandi (D), Pune – 412105	SEM / TRI	II
DEPARTMENT OF CHEMICAL ENGINEERING	CLASS & DIVISION / BLOCK	FY B.Tech-ALL

ACTIVITY NAME	NASSCOMM CERTIFICATION		
COURSE	CREATIVE TECHNOLOGIES (2301183)	Lab Activity NO.	01 (One)
COURSE INSTRUCTORS	VINAYAK KULKARNI & TEAM	DATE	25-01-2026

STUDENT NAME	KANAM RAMKRISHNA YEOLE	PRN	202501050007
TRACK	AI - 02	TRACK TEACHER	MR. AMIT KUMAR SHINDE

Que. No.	Question Description/ Design Problem Statement	Marks	CO No.	BT Level
Q1	Please read assignment statement below , the students Online Industrial Certification Course Digital 101-30 Hours (GOI, AICTE, NASSCOMM, NSDC)submit the Reflection report in prescribed formaty (pdf) on Moodle	20	CO3	L2, L3

(Remark: Course Instructor to add assessment rubrics for each assignment)

RUBRICS:

Criteria	CO Addressed	Completion of Course (20 Marks)	Incompletion of Course(0 Marks)
Activity Completion & Reliction Report	CO3	Completion of all modules of course Digital 101-30 Hours, produced course completion report (15 Marks)	- Student not registered to course - Not completed the course - Not completed all course activities
		Produced Report and evaluated by Track Teacher (05 Marks)	Simply Not completed the course , without showing the appropriate work, which is to be graded, will also be awarded a score of "0."

ASSESSMENT:

Date	Marks (20)	Sign of Track Teacher	Name of Track

INSTITUTE LEVEL SUBMISSION LINK:

(Only Certificates)

https://docs.google.com/forms/d/e/1FAIpQLSeFatr8OUi5FJGrX5R_1-17POp0d3zLPbSMrQx0wcUDpiwTTA/viewform?usp=publish-editor

(** Every student will upload certificates in pdf with above mentioned Link)

Instructions:

1. Complete this word file Activity report Template
2. Take Hardcopy of this report, get sign & Grade (10) from Track Teacher
3. Submission on Moodle. (Pdf Format).
4. All FY students appearing for course Creative Technologies must do this submission individually.
5. Submit certificates only to institute level link
6. Submit this report to track teacher for grading

(Vinayak B Kulkarni)

CA ACTIVITY STATEMENT

(Course Outcome (CO3)- *Illustrate the use cases of emerging technologies. [L2].*)

INTRODUCTION:

Name of Activity	Online Industrial Certification Course Digital 101-30 Hours (GOI, AICTE, NASSCOMM, NSDC)
Activity Details	Value Added Course Certifications on Future Skills or Future Technologies [Compulsory for every student] a) An Industrial Value-added course certification from Industries Agencies of repute will award 20 Marks b) For year 2025-26, A course Digital 101(30 Hours-Self Paced) hosted by Futureskillsprime Supported by Govt. of India, AICTE, NASSCOMM, SKILL India, NSDC etc. COs: CO3- Illustrate the use cases of emerging technologies. [L2] POs: PO-1, PO-06, PO-11 PSOs: PSO1 to PSO4

REGISTRATION PROCESS:

LINK: <https://www.futureskillsprime.in/journey/digital-101-30-hours/>

- ✓ Click on Enrol, You have to join with google
- ✓ Use Personal Email ID to which APAAR ID and Digi-locker is attached (Important !!!)
- ✓ Refer a separate document attached NASSCOMM Certification Process.pdf

Submission Report (Module Completion Report) (100% Completion of all prescribed modules)

The screenshot displays the 'Digital 101 - 30 Hours' pathway on the Future Skills Prime platform. The pathway is marked as 100% completed, with 54 of 54 modules finished. The following table summarizes the modules listed in the pathway:

Module Title	Duration	Completion Status	Retake Button
An Overview of Artificial Intelligence	31 minutes 35 seconds	100% (7 of 7 Completed)	Retake
Introduction to Machine Learning	32 minutes 38 seconds	100% (6 of 6 Completed)	Retake
Introduction to Deep Learning	36 minutes	100% (7 of 7 Completed)	Retake
ChatGPT	26 minutes 31 seconds	100% (6 of 6 Completed)	Retake
GPT-4	22 minutes 16 seconds	100% (5 of 5 Completed)	Retake
ChatGPT in Marketing	-	100%	Retake

The dashboard also features a sidebar with navigation options: Dashboard, My Products, Groups, My Ledger, Skills Passport, Transactions, and Account. A chatbot icon is visible in the bottom right corner with the text 'Hey there! How can we help?'.

Submission Report

(Certificate for Course -Digital 101-30 Hours)

Certification Procedure: [Certification based on Quiz]

- Complete all modules with 100% completion, Verify from Dashboard
- Goto site home page, Search Module "Digital 101-30 hours Assessment"
- You will Get 02 results-
 - a) Digital 101 Assessment- Mock(free)
 - b) Digital 101 Assessment- final (paid)
- Digital 101 Assessment- Mock(free)- this is practice test before you go for final assessment, this will not produce certificate
- Digital 101 Assessment- final (paid)- This final certification Quiz, you need to pay for certification like other certification exam NPTEL, CISCO
- After Completion You will get Graded certificate with Marksheet in Gold, Silver & Bronz categories in your dashboard

GOLD

CERTIFICATE

This is to certify that

KANAM YEOLE

has successfully cleared the assessment on

Digital 101 – 30 Hours

FSP/2026/4/10283882

Aligned to Competency Standards developed by IT-ITeS Sector Skills Council
NASSCOM in collaboration with Industry and approved by Government.

12/04/2026

Date of issue

Dr. Abhilasha Gaur

CEO, IT- ITeS Sector Skills Council
NASSCOM

Gold Category: 70% and above score.

Detailed Scorecard included

Certificate Details

Candidate Name	Kanam Yeole
Assessment/Course Name	Digital 101 – 30 Hours
Date of Issue	12/04/2026
Certification ID	FSP/2026/4/10283882
Category Gold >=70% / Silver 60%-69% / Bronze 50%-59%	Gold

FSP/2026/4/10283882

Assessment Score

Module Name/NOS ID	NSQF Level	Maximum Marks	Marks Obtained	Percentage
M001	5	32	24	75.00
M002	5	48	45	93.75
M003	5	20	12	60.00
Total		100	81	81.00

List of Modules Completed
(Type List of all Modules completed)

1. An overview of Artificial Intelligence
2. Introduction to Machine Learning
3. Introduction to deep learning
4. ChatGPT
5. GPT – 4
6. ChatGPT in Marketing
7. Open AI Tools: AI text classifier
8. Open AI Tools: Point – E
9. Open AI Tools: Text-to-Image generator DALL-E
10. Applications of Artificial Intelligence
11. Intelligent Wearables and Bionics
12. AI in Electric Vehicles (EVs)
13. AI and Metaverse
14. Impact of Artificial Intelligence on Workforce and Workplace
15. Future of Artificial Intelligence in various industries
16. Edge AI/Tiny ML
17. Quantum computing
18. Evolution of Big Data Analytics
19. An overview of Big Data Analytics
20. Applications of Big Data Analytics
21. Database Management for Data Science
22. Getting started with Internet of Things
23. Applications of IoT
24. Industrial Internet of Things or IIoT
25. Digital Payments
26. An overview of Cloud Computing
27. Applications of Cloud Computing
28. Service Models in Cloud Computing
29. Popular Software tools and Techniques used in Cloud computing
30. An overview of Cybersecurity
31. Applications of Cybersecurity
32. Types of Cyber Attacks
33. Data Privacy and user data control
34. Deepfake
35. Evolution of blockchain
36. Getting started with blockchain
37. Applications of Blockchain in Finance Industry
38. Impact of blockchain on Workforce and Workplace
39. Getting started with Robotic Process Automation
40. 3 core technologies of Robotic process Automation
41. Applications of Robotic Process Automation in Banking and Insurance Industry
42. Getting started with Web, Mobile Development and Marketing
43. 5Ds of Digital Marketing
44. Digital Storytelling
45. Getting Started with 3D Printing & Modelling
46. Digital Manufacturing
47. Future of 3D printing & Modelling in various industries
48. Getting Started with Augmented Reality & Virtual Reality
49. Pre-requisites for Augmented Reality & Virtual Reality
50. Metaverse
51. Applications of Augmented Reality & Virtual Reality in Banking & Insurance
52. VR best Practices and Challenges
53. AI Ethics
54. Ethical Considerations of Generative AI

Reflection Report on Online AI courses

1. Artificial Intelligence, Machine Learning & Deep Learning: Through these courses, I gained a clear understanding of how Artificial Intelligence works as a broad field. Initially, AI seemed like a complex and futuristic concept, but this course helped me see it as a system that enables machines to mimic human intelligence such as learning, reasoning, and decision-making. The introduction to Machine Learning helped me understand how systems learn from data instead of being explicitly programmed. I understood how technologies like image recognition and voice assistants are powered by deep learning.

Overall, this section built my foundation and made me realize how AI is already part of our daily lives through applications like recommendation systems, automation, and smart devices.

2. Generative AI and OpenAI Tools: Learning about ChatGPT and GPT-4 gave me hands-on exposure to generative AI. I learned how these tools can generate text, answer questions, and assist in various tasks. The modules on OpenAI tools like text classifiers, Point-E, and DALL-E showed how AI can go beyond text and create images and classify content. This made me realize the creative potential of AI. I also learned about ethical considerations in generative AI, such as bias, misinformation, and responsible usage. This made me more aware that while AI is powerful, it must be used carefully.

This section improved my practical skills and helped me understand how to use AI tools effectively and responsibly.

3. AI in Industry and Emerging Technologies: This section explored how AI is applied in real-world industries. I learned about intelligent wearables, bionics, and how AI is used in electric vehicles for automation and safety. The concept of the metaverse and AI's role in creating virtual environments was fascinating. It showed how digital and physical worlds are merging. I was also introduced to advanced topics like Edge AI and Tiny ML, which focus on running AI models on small devices, and quantum computing, which represents the future of computing power. This section helped me understand that AI is not limited to software but is deeply connected to hardware and future innovations.

4. Big Data and Database Management: In this module, I learned how data plays a crucial role in AI. Big Data Analytics helps in processing large volumes of data to extract useful insights. I understood the evolution of data systems and how modern analytics tools help organizations make better decisions. Database management was also an important part, as it taught me how data is stored, organized, and accessed efficiently.

This section made me realize that without proper data management, AI systems cannot function effectively.

5. Internet of Things (IoT) and Industrial IoT: The IoT modules explained how devices are connected through the internet and can communicate with each other. I learned about smart homes, smart cities, and industrial automation.

Industrial IoT (IIoT) showed how industries use connected devices to improve efficiency and productivity.

This section helped me understand how AI and IIoT together create smart systems that can operate with minimal human intervention.

6. Cloud Computing and Digital Systems: Cloud computing was explained as a system that allows storage and processing of data over the internet instead of local machines. I learned

about different service models like SaaS, PaaS, and IaaS. I also understood how digital payments and cloud-based tools are transforming businesses and everyday transactions. This section highlighted the importance of scalability, flexibility, and accessibility in modern technology systems.

7. Cybersecurity, Privacy and Risks: This module focused on protecting systems and data. I learned about different types of cyberattacks and how they can harm individuals and organizations. The concept of data privacy was very important, especially in today's digital world. I also learned about deepfakes and how AI can be misused to create misleading content. This section made me more cautious and aware of digital risks and the importance of security practices.

8. Blockchain and Emerging Financial Technologies: Blockchain was introduced as a secure and decentralized system for recording transactions. I learned how it is used in finance and how it ensures transparency and trust. The impact of blockchain on workplaces showed how it can change traditional systems and reduce dependency on intermediaries. This section helped me understand the future of secure digital transactions.

9. Robotic Process Automation (RPA): RPA focuses on automating repetitive tasks using software robots. I learned about its core technologies and how it is used in banking and insurance sectors. This module showed how automation can improve efficiency and reduce human effort in routine tasks.

10. Digital Marketing and Creative Technologies: This section covered web and mobile development basics along with digital marketing concepts like the 5Ds and storytelling. I learned how digital platforms are used to connect with audiences and how content plays a key role in engagement.

11. 3D Printing, AR/VR and Metaverse: These topics introduced me to futuristic technologies like 3D printing, augmented reality (AR), and virtual reality (VR). I learned how these technologies are used in industries like healthcare, education, and banking. The concept of the metaverse showed how immersive digital environments can transform user experiences. This section was very exciting as it gave a glimpse into future innovations.

Overall Understanding and Reflection:

Through all these courses, I developed a broad and practical understanding of modern technologies. I realized that AI is not a standalone field—it is connected with data, cloud computing, IoT, cybersecurity, and many other technologies. These courses also improved my confidence in understanding and using new technologies. I now feel more prepared for future academic and career opportunities in a digital and AI-driven world.

In conclusion, this learning experience has given me both knowledge and awareness, helping me understand not only how technologies work but also their impact on society.
